Functional Test Checkpoints

- Purchase side: requisition, PO approval, GRN posting, and inventory increase.
- Inventory side: putaway location updates, available quantity, and status transitions.
- Sales side: sale creation, pick/pack/dispatch, inventory deduction, invoice/payment.
- Side effects: inventory ledger rows and accounting entries at each branch.
- Negative flows: partial GRN, rejected QC, insufficient stock, partial/no payment, sales return.

Tip: Open this PDF and send it directly to the testing team.
