Testing Guide: Reports & Analytics Flow

Overview

Provides intelligence and data exports across all the modules.

Components to Test

Financial Reports, HR Reports, Inventory Reports, Purchase Reports, Sales Reports, Service Reports, GST Reports, KPI Reports.

Step-by-Step Manual Testing

1. **Data Generation**
    - *Prerequisite:* Ensure you have completed testing in the Sales, Purchase, and Inventory flows so there is dummy data in the system.
2. **Testing Core Reports**
    - Go to `Sales Reports` -> Generate a 'Sales by Branch' or 'Sales by Date' report.
    - **Check:** Does the total match the POS Sales you created in Flow 5?
    - Go to `Inventory Reports` -> Generate a 'Stock Valuation' or 'Current Stock' report.
    - **Check:** Does the stock level match the stock ledgers in Flow 3?
    - Go to `Financial Reports` -> Generate a 'Profit & Loss' or 'Balance Sheet'.
    - **Check:** Do the manual journal entries and sales/purchase invoices reflect correctly?
3. **Export Functionality**
    - **Check:** Test the Export features (CSV, Excel, PDF) on these reports. Ensure the exported files open without corruption and formatting is maintained.
